

MAT627 Chapter 2.6 Programming Assignment

Emre Tekmen

April 20, 2026

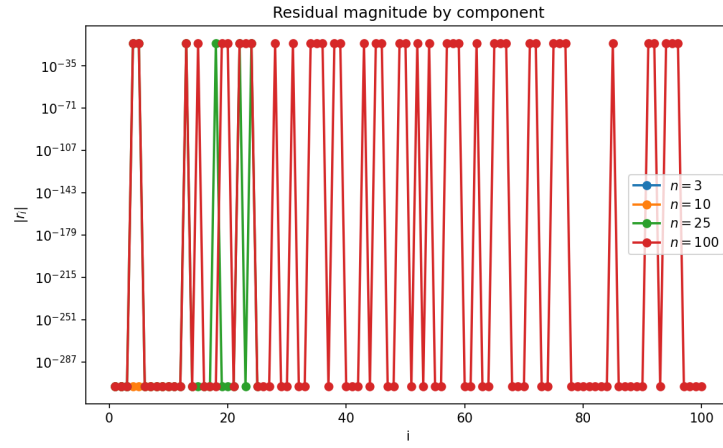

Figure 1: Residual component magnitudes for the four test systems.

Table 1: Maximum residual component for the tridiagonal solves.

n	$e_n = \max_i r_i $
3	0.000000×10^0
10	0.000000×10^0
25	2.220446×10^{-16}
100	2.220446×10^{-16}

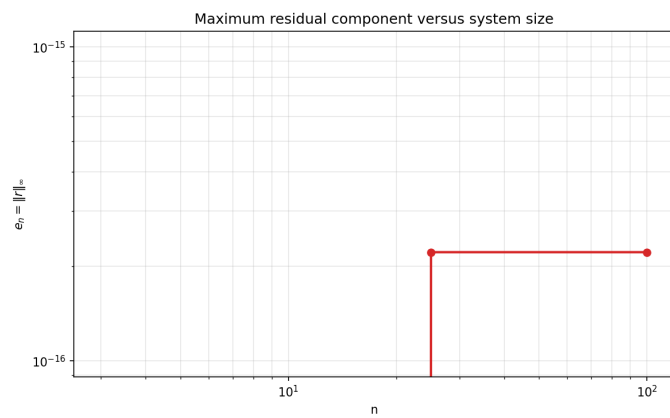

Figure 2: Maximum residual magnitude as a function of system size.
